Titan Airways Renews and Extends Wheel and Brake Support Contract with Rotalable Repairs

Following a successful two years of support, Titan Airways has signed up for another three with Wheel and Brake specialist Rotalable Repairs.

The per maintenance event contract offers great value, located consignment stock and free delivery and collection between all London Airports from its increasing fleet of vehicles.

Bryan, Sales & Marketing Director said: "We're delighted to offer our continued dedication and expertise to Titan Airways following a successful two-year span of aircraft wheel and brake support. As our relationship continues we plan to utilize our knowledge and expertise to ensure Titan Airways gets the service and value it deserves"

Rotalable Repairs continue to tailor their support program to the charter airline's evolving fleet of Boeing and Airbus Aircraft by stocking, consigning wheel and brake material and by forging strong relationships with its suppliers.

While many other airlines have come and gone, Titan Airways has continued to expand its operations despite the challenges in the industry and the economy in general.

Titan Airways has won the BACA Best Passenger Charter Airline Award on multiple occasions and today has the prestigious reputation of the Airline of Choice for a wide variety of air charter services worldwide.

Recent 2016 expansion and 2017 improvements, which include a multi-unit Logistics Centre, additional customer support staff, a larger collection fleet and a range of additional workshop equipment have allowed the Wheel & Brake Specialists to allocate, improve and further expand production space for additional contractual work.

Rotalable Repairs, formed in March 2002 have been dedicated to Aviation Wheel and Brake Services and is committed to delivering high quality, cost effective products and services to Airlines, Hangar Facilities and Stockists. Our team of staff is available to offer a friendly, professional service that is based on an experienced understanding of the aviation industry.
